We deliver over 95% of dumpsters within the drop off window, however it is still an estimated delivery time and by no means a guarantee that your delivery will occur within the time window you are given.
 - Allow adequate space for the dumpster to be delivered. We require approx. 12' wide by 55' long to maneuver the truck and place the dumpster (the "Dropoff Zone"). That allows 2 feet each side of the dumpster and at least 40 feet in front of the dumpster.
 - Dumpsters cannot be placed if there are trees or overhead lines lower than 20 feet in the Dropoff Zone
 - Unless otherwise requested, dumpsters will be placed at least 10 feet from a garage door/wall to allow the rear door to be opened for loading.
